

Day Four

❖ Java Business Integration

- ❖ The JBI Components
- ❖ Binding components
- ❖ Service engines
- ❖ Normalised message router
- ❖ JBI bridge

❖ BPEL 2.0 Business Processes

- ❖ Creating XSDs
- ❖ Creating WSDLs
- ❖ Creating a BPEL 2.0 business process
- ❖ Setting persistence in a BPEL business process
- ❖ Creating composite applications
- ❖ Deploying composite applications

Day Five

❖ The GlassFish Admin Console

- ❖ Working with Log Files
- ❖ Managing Composite applications, deploying and undeploying
- ❖ Managing JBI components
- ❖ Binding Components
- ❖ Service Engines

➤ Skills Gained

- Develop JCAPS 6 projects to an Intermediate level
- Develop solutions using Repository components
- Develop solutions using JBI components
- Understand Business Process Management in the Repository and JBI environments
- Gain an understanding of advanced JCAPS 6 topics

**Java CAPS 6
for
Developers Course**

**5 Day Instructor-led
Course**

➤ Course Description

- Java CAPS 6 for Developers is an intensive 5 day hands-on course.
- Students will gain a solid foundation in JCAPS 6 to an intermediate level whilst gaining an appreciation for more advanced topics.
- The course takes a very practical approach to JCAPS 6 with instructor-led demonstrations and real world exercises.
- Focuses on Repository and JBI development
- At the end of the course Students will be able to design and develop sophisticated JCAPS 6 solutions.

➤ Who Can Benefit

- The course is aimed at software developers who want to gain a practical understanding of JCAPS 6.

➤ Prerequisites

- The student will have a basic understanding of Integration and Java.

Day One

❖ Overview of Java CAPS 6

- ❖ Java CAPS Products
- ❖ Java CAPS Toolset
- ❖ Overview of Development Options
 - ❖ Repository
 - ❖ JBI
 - ❖ J2EE

❖ Installation of Java CAPS

- ❖ Windows installation
- ❖ Installing Repository Components
- ❖ Installing JBI components
- ❖ Updating NetBeans IDE

❖ Creating and Deploying a Repository Project

- ❖ Project Creation Roadmap
- ❖ CAPS Component Library
- ❖ Creating a Repository Project
 - ❖ Creating a Java Collaboration
 - ❖ Creating a Connectivity Map
- ❖ Creating an Environment
- ❖ Creating a Deployment Profile
- ❖ Deploying the project

❖ Monitoring a Repository Project

- ❖ Using the Enterprise Manager
- ❖ Monitoring repository components
- ❖ Monitoring JMS queues/topics
- ❖ Enterprise Manager Command Line Client

Day Two

❖ Importing and Exporting Projects

- ❖ Exporting:
 - ❖ using NetBeans IDE
 - ❖ using Command Line Utilities
- ❖ Importing:
 - ❖ using NetBeans IDE
 - ❖ using Command Line Utilities

❖ Repository Object Type Definitions

- ❖ Purpose of an OTD
- ❖ Types of OTD
- ❖ Pre-built OTDs
- ❖ Creating user-defined OTDs

❖ Repository Collaboration Definitions

- ❖ Creating Java Collaborations
- ❖ Using the Java Collaboration Editor
- ❖ Exception Handling
- ❖ Logging and alerting capabilities

❖ Exception Handling, Log Files and Debugging

- ❖ Log Files
- ❖ Writing to Log Files and raising alerts
- ❖ Exception Handling techniques

Day Three

❖ Repository Database Connectivity

- ❖ Creating database OTDs
- ❖ Writing Java Collaboration rules to interact with databases
- ❖ Working with tables/views, stored procedures, prepared statements

❖ SUN Business Process Manager

- ❖ Overview of Business Processes
- ❖ Components of a business process
- ❖ Monitoring capabilities

❖ SUN Business Process Exception Handling and Deployment

- ❖ Scope Exception Handling
- ❖ Catching named exceptions
- ❖ Catching all exceptions
- ❖ Deploying Business Process Models
