GP Connect integration
Access GP data across care settings

Mobilise GP data across care settings with Restart's GP Connect integration. Access the only free source of GP data, to save time and money, provide safer patient care, and directly support the NHS interoperability agenda.

Boost collaboration

Open up the information held with GP practice systems to support providers across mental health, community and social care, A&E and secondary care.

Proactive decisions

With GP data shared across systems, you can set up custom alerts and triggers so that users across care settings make better decisions with the latest information.

Share structured data

GP Connect shares structured data via open APIs. This means that clinicians can access standardised information no matter where they work.

Realise investment faster

Unlike the MIG, GP Connect does not carry a licence fee which means you'll reap the benefits of your integration investment quickly.

Build a custom viewer

GP Connect data is returned in a web page which means we can customise the layout to suit the needs of your organisation and clinicians.

Benefits of GP Connect
- Detailed medical records
- Full consultation history
- Medications and allergies
- Automatic alerts
- Future appointments
- Assign tasks

RESTART
Building integrated healthcare

Delivering integrated care systems better, faster and with less.

UK's integration leader

Our integration architects understand healthcare requirements and configure integration solutions to streamline effectively within, or alongside, existing systems.

Achieving the Long Term Plan

GP Connect integration directly supports the interoperability of Primary Care Networks (PCNs) and Integrated Care Systems (ICS) by getting valuable GP data exactly where it's needed.

GP Connect integration add-ons

BACKUP
Recover critical information in the event of data loss or system breach

SYSTEM AUDIT
Review the efficiency and security of your integration environment

24/7 INTEGRATION SUPPORT
Protect your critical systems against potential interruptions to service

INTEGRATION ENGINE MIGRATION AND UPGRADES
Replace or enhance your integration engine to optimise performance and improve security

CONNECTED CARE
Give healthcare users access to a truly collaborative digital health record
